Motion 8 Agency — Pre-Launch SEO Audit

September 3, 2026 · Scope: pre-launch readiness audit + keyword research, benchmarked against mobikasa.com, NoGood, and SimpleTiger

A note on data sources. motion8agency.co isn't live yet, so this audit covers what can be checked pre-launch: the planned 42-page structure, on-page readiness of the built templates, and a content-gap comparison against real competitor sites. Semrush was unavailable (API units exhausted) for this run, so keyword volume/difficulty below are qualitative signals from web research, not verified search-volume data — reconnect Semrush before finalizing a content calendar for precise numbers.

Executive Summary

Motion 8's content foundation is unusually strong for a pre-launch site: 47 artboards covering all 26 services with genuine 15-question FAQs, a clean 42-URL sitemap, verified meta titles and descriptions on every indexable page, and one well-formed H1 per template. That depth already beats what most competitors show on individual service pages.

The gap is everything *around* those service pages. All three benchmarked competitors — mobikasa.com, NoGood, and SimpleTiger — build authority through a blog/resources hub, real quantified case studies, and (for two of the three) dedicated industry or funding-stage landing pages. Motion 8 currently has **zero** blog content, **placeholder** case studies, and **no** vertical or stage-specific pages. None of this blocks launch, but it's the single biggest driver of organic authority competitors are using and Motion 8 isn't yet.

Top 3 priorities:

1. Replace placeholder case studies with real, quantified client stories — this is both a content-gap and a trust-signal fix, and it's the one competitors lean on hardest.

2. Spec FAQPage structured data for the dev build — a near-zero-cost win given 31 pages already have genuine, substantial FAQ content ready to mark up.
3. Plan a blog/resources hub — not a launch blocker, but the clearest medium-term visibility gap vs. all three competitors.

Overall assessment: strong foundation, needs work before it can out-rank the competitive set.

Keyword Opportunity Table

Qualitative signals (no live Semrush data this run — see note above). Sorted by opportunity score.

Keyword	Est. Difficulty	Opportunity Score	Intent	Recommended Content Type
growth infrastructure for startups	Easy	High	Commercial	Home H1 / brand term — Motion 8 can own this coined phrase
what is growth infrastructure (for a startup)	Easy	High	Informational	Glossary / thought-leadership post
AEO / answer engine optimization agency	Easy	High	Commercial	Already built (AEOGEOOptimization.dc.html) — reinforce with glossary + blog
what is AEO / GEO optimization	Easy	High	Informational	Glossary entry, links into existing service page

Keyword	Est. Difficulty	Opportunity Score	Intent	Recommended Content Type
ADA compliance audit for startups	Easy	High	Commercial	New service page — zero coverage today, mobikasa owns this category
MVP development agency	Moderate	High	Commercial	Already built — add cost-guide content to support it
how much does a startup MVP cost	Easy–Moderate	High	Informational/Commercial	Blog post + feeds a pricing calculator
dedicated development team for startups	Moderate	Medium	Commercial	Already built
workflow automation agency	Moderate	Medium	Commercial	Already built
custom AI agents development	Moderate	Medium	Commercial	Already built
LLM fine-tuning services	Moderate	Medium	Commercial	Already built
RAG development agency	Easy–Moderate	Medium	Commercial	Already built
Shopify vs Shopify Plus for startups	Easy	Medium	Informational	Comparison blog post, links both platform pages

Keyword	Est. Difficulty	Opportunity Score	Intent	Recommended Content Type
software development agency for startups	Moderate	Medium	Commercial	Pillar hub — reinforce with case studies
digital marketing agency for startups	Moderate	Medium	Commercial	Pillar hub — reinforce with case studies
AI automation agency for startups	Easy–Moderate	Medium	Commercial	Pillar hub
seed-stage startup marketing agency	Easy	Medium	Commercial	Gap — SimpleTiger segments by funding stage, Motion 8 doesn't
Series A startup growth agency	Easy	Medium	Commercial	Same gap as above
conversion rate optimization agency for startups	Easy	Medium	Commercial	Already built
Shopify Plus development agency	Hard	Medium	Commercial	Already built — mobikasa ranks here directly
SaaS SEO agency	Hard	Low–Medium	Commercial	SimpleTiger owns this term; only pursue with a dedicated SaaS vertical page

Keyword	Est. Difficulty	Opportunity Score	Intent	Recommended Content Type
fintech marketing agency	Moderate–Hard	Low–Medium	Commercial	Gap — no industry vertical pages exist yet
blockchain development agency for startups	Moderate	Low–Medium	Commercial	Already built
web3 development agency	Moderate	Low–Medium	Commercial	Already built
custom software vs off-the-shelf for startups	Easy	Low–Medium	Informational	Blog post, top-of-funnel

On-Page Issues Table

Page/Area	Issue	Severity	Recommended Fix
Home (Main.dc.html)	H1 doesn't contain the primary phrase "growth infrastructure for startups" — it's in the eyebrow only	Medium	Work the phrase naturally into the H1 or the sentence immediately following it

Page/Area	Issue	Severity	Recommended Fix
All 47 templates	No real `<a href>` navigation, breadcrumbs, or in-body cross-links — mega-menu and "View all →" links are static text/spans	Critical (for dev build)	Spec real internal linking + breadcrumb trail before/during dev build; not a design-phase blocker
All 47 templates	No structured data (Organization, Service, FAQPage, BreadcrumbList JSON-LD)	High	Add FAQPage schema first — 31 pages already have genuine, substantial FAQ content ready to mark up with near-zero extra writing
Site-wide	No standalone `/pricing/` page — pricing tiers exist only inside individual Platform Expert / Sub-Service pages	Medium	Spec a consolidated pricing overview page pulling from already-built tiers
Site-wide	No industry/vertical landing pages (SaaS, Fintech, Healthcare, etc.)	Medium	See Content Gap Recommendations below
Home, CaseStudiesList	Case study content is still placeholder (`[Project title]`, "Illustrative example")	High	Already flagged in the prior content audit — blocked on real client stories from Vansh

Page/Area	Issue	Severity	Recommended Fix
Sub-Service / Platform Expert pages	No blog or resources content linking into these pages for topical depth	High	See Content Gap Recommendations below
All 47 templates	Meta titles / descriptions	Pass	Verified 2026-09-03 — 42/42 pages in range, no duplicates
All 47 templates	Image alt text	Pass	Verified non-empty and intent-descriptive; real copy correctly deferred until after UI/UX
All 47 templates	One H1 per page	Pass	Verified across all 6 core templates
sitemap.xml / robots.txt	Crawlability	Pass	42-URL sitemap validated, robots.txt correctly references it

Content Gap Recommendations

1. Blog / Resources hub — Why it matters: all three competitors (mobikasa, NoGood, SimpleTiger) run one; it's the clearest visibility gap in this comparison. Format: blog + eventually a glossary. Priority: High. Effort: Substantial (multi-day, ongoing).

2. Real, quantified case studies — Why it matters: competitors lead with hard numbers (NoGood cites 879% growth and a $22M acquisition; SimpleTiger cites a 41:1 ROI case study with 19+ named clients). Motion 8's are still placeholders. Format: case study pages + pull-quotes reused on service pages. Priority: High. Effort: Moderate, but blocked on Vansh sourcing real client data and permission.

3. Industry/vertical landing pages — Why it matters: NoGood and SimpleTiger both segment heavily by industry (SaaS, Fintech, Healthcare, B2B) and those pages capture commercial-intent searches like "fintech marketing agency" that a generic service page won't rank for. Format: 3–5 new landing pages combining a vertical + Motion 8's core pillars. Priority: Medium. Effort: Substantial — needs a positioning decision from Vansh on which verticals to prioritize.

4. Funding-stage pages or messaging — Why it matters: SimpleTiger explicitly segments by Seed / Series A / Enterprise. Motion 8's whole positioning is "funded startups" — this is a natural extension, not a stretch. Format: could be full pages, or lighter-weight stage callouts woven into the existing pillar hubs. Priority: Medium. Effort: Moderate.

5. Standalone pricing page — Why it matters: quick win — the pricing data already exists (Shopify, Shopify Plus, WooCommerce tiers), it's just scattered across individual pages. A consolidated page also matches SimpleTiger's pattern. Priority: Medium. Effort: Quick win (1–2 hours to spec, since content already exists).

6. Glossary — Why it matters: captures long-tail "what is X" queries (what is AEO, what is GEO, what is growth infrastructure) with minimal content investment per entry, and feeds internal links back to the relevant service page. Priority: Medium. Effort: Moderate.

7. ADA / accessibility compliance service page — Why it matters: mobikasa runs an entire navigation category for this (VPAT, remediation, training, testing) and Motion 8 already references "ADA compliance" as a checkbox feature under Shopify Plus pricing tiers — but has no page actually targeting the keyword. Priority: Low–Medium. Effort: Quick-to-moderate — largely a repackaging of a capability Motion 8 already claims to have.

8. ROI / cost calculator tool — Why it matters: SimpleTiger's SEO ROI Calculator is a link-worthy asset type Motion 8 doesn't have any equivalent of. Priority: Low–Medium. Effort: Substantial — nice-to-have, not urgent.

Technical SEO Checklist

Check	Status	Details
XML sitemap	Pass	42 URLs, validated well-formed, delivered
robots.txt	Pass	Correctly references sitemap.xml
Meta titles / descriptions	Pass	42/42 verified in range, zero duplicates (see prior deliverable)
Image alt text	Pass	Structural placeholders correctly described; real copy deferred until after UI/UX by design
One H1 per page	Pass	Verified across all 6 core templates
Primary keyword in H1	Warning	Missing on Home — see On-Page Issues
Internal linking (real hrefs, breadcrumbs)	Fail	Not implemented — expected at mockup stage, must be specced for dev build
Structured data (schema.org)	Fail	Not implemented anywhere — FAQPage schema is the highest-leverage quick win given existing FAQ content
Canonical tags	N/A	Not applicable until dev build / live domain
HTTPS	N/A	Domain not live yet
Page speed / Core Web Vitals	N/A	Cannot be tested pre-build; add to dev-handoff QA checklist

Check	Status	Details
Mobile-friendliness	Partial	Mobile breakpoints exist for 6 core templates only, with shortened FAQs (already flagged in prior audit)
Duplicate content	Pass	Checked — no duplicate titles or descriptions across all 42 pages

Competitor Comparison Summary

Dimension	Motion 8 (planned)	mobikasa.com	NoGood	SimpleTiger	Winner
Page/service inventory	42 pages, 26 services, 3 pillars	Broader — ecommerce, dev, marketing, accessibility, gov/health	Narrower, deep by channel + industry	Narrower, deep by industry + funding stage	Mobikasa (breadth) / Motion 8 (depth)
FAQ / on-page depth	15 genuine Q&As per service page (31 pages)	Not verified at this depth	Guides & insights, no per-service FAQs	Deep guides + glossary	Motion 8

Dimension	Motion 8 (planned)	mobikasa.com	NoGood	SimpleTiger	Winner
Case studies	Placeholder only	3 featured, with metrics	Multiple, hard numbers (879% growth, $22M exit)	19+ named clients, 41:1 ROI cited	Competitors (until real)
Blog / resources hub	None planned	Referenced in footer	Strong — blog, guides, insights	Strong — blog, glossary, tools	Competitors
Industry/vertical pages	None	Some (healthcare, gov)	Strong (SaaS, Fintech, Health, B2B)	Strong (many verticals)	Competitors
Funding-stage segmentation	Positioning only, in copy	None	None	Explicit (Seed / Series A / Enterprise)	SimpleTiger
Meta title/description hygiene	Verified, 100% in range	Not verified	Not verified	Not verified	Motion 8
Structured data	Not yet implemented	Not verified	Not verified	Likely (rich snippets)	Flag for dev build

Prioritized Action Plan

Quick Wins (do this week)

- **Fix Home H1** to naturally include "growth infrastructure for startups." — Impact: Medium · Effort: <1 hr · No dependencies.
- **Spec FAQPage JSON-LD** for the dev-handoff doc, covering the 31 pages that already have real 15-question FAQs. — Impact: High · Effort: 1–2 hrs to spec (dev implements at build) · No dependencies.
- **Spec a standalone `/pricing/` page** pulling together the Shopify / Shopify Plus / WooCommerce tiers already built elsewhere. — Impact: Medium · Effort: 1–2 hrs · No dependencies.
- **Draft 3–5 glossary stub entries** (AEO, GEO, "growth infrastructure") that link into the existing AEOGEOOptimization page and Home. — Impact: Medium · Effort: 1–2 hrs · No dependencies.

Strategic Investments (plan for this quarter)

- **Build the blog/resources hub and a content calendar.** — Impact: High · Effort: Substantial, ongoing · Dependency: works best once real case studies exist, for credibility.
- **Replace placeholder case studies with real, quantified client stories.** — Impact: High · Effort: Moderate · Dependency: Vansh sourcing client data + usage permission (same blocker flagged in the prior content audit).
- **Build 3–5 industry vertical landing pages** (SaaS, Fintech, and 1–3 others). — Impact: Medium–High · Effort: Substantial · Dependency: Vansh deciding which verticals to prioritize.
- **Add funding-stage messaging or dedicated pages** (Seed / Series A). — Impact: Medium · Effort: Moderate · Dependency: positioning call from Vansh — could piggyback on the pillar hub redesigns already in progress.
- **Spec internal linking, breadcrumbs, and full schema markup for the dev build.** — Impact: High (technical foundation) · Effort: Substantial · Dependency: dev-build phase, not blocked on visual design.
- **Build an ROI/cost calculator tool.** — Impact: Low–Medium · Effort: Substantial · Dependency: none — lowest priority of this list, nice-to-have.
